

Welding Blanket 950°C

Art. No.: 70 155 100

Applications

- For moderate load in vertical use
- Protection against weld spatter, flying sparks and grinding sparks

Benefits

- Reliable protection against weld spatter, flying sparks and grinding sparks due to glass fabric

Properties

- lined on all sides
- Made from vermiculite coated fiberglass
- Resistant up to 750° C, briefly up to 950° C
- Can be exposed to mechanical loads, abrasion-proof

Technical Data

Basic data	
Width	1000 mm
Height	1000 mm
Thickness	1.06 mm
Weight	875 g/m ²
Colour	black, RAL 9005
Temperature	up to 950
Longitudinal tensile strength	1650 N/5cm
Transverse tensile strength	1100 N/5cm
